

# SortVault E-Discovery

*Pharmaceutical is a highly regulated industry and companies can expect to be involved in significant challenges regarding product liability, drug withdrawals, warnings, M&A, antitrust, IP, class actions, mass torts and other civil matters. Due to the confidential nature of the data and demanding timeframes, many considerations go into working on E-discovery requests. An experienced partner such as Numina MedLegal can meet your counsel and stakeholder requirements to **manage document production, collection, and review to gain visibility into large data sets, responses to interrogatories, depositions, trial preparation, and other allied needs.***

## SortVault Platform CAPABILITIES

Load all documents into Numina MedLegal SortVault Platform

Catalog and track documents by custodian, by file type to help locate relevant custodians and data sources that matter

Comprehensive metadata extraction, full text extraction, full text and metadata indexing, advanced deduplication, and comprehensive reporting

Customizable review workflows that reduce reviewer errors and increase consistency of review, encompassing culling, processing, reporting and exporting

Configured workflow for automated routing and distribution to streamline document review, ensuring right documents go to right reviewer, e.g., lab notebooks, development records, invention disclosures, research notes or other specific record types

Customizable interactive analytics dashboards that turn data into knowledge with a drone view of your entire document collection, allowing you to drill down and profile the details, get key metrics in various contexts, discover trends and draw comparisons across the portfolio

Interactive timeline to browse through all documents, custodians, data tags and work productions within one convenient interface

Drag and Drop ingestion with tagging of pertinent and non-pertinent pages; pin pertinent pages into documents

Deduplication as a Service — Consolidate your redundant documents with fully customizable filtering, search, near-deduplication

More than just identifying similar documents — route them based on case needs, perform a secondary review, group similar documents for a quicker review, identify the most content-inclusive documents, and visually locate documents pertaining to data attributes that matter

Get your eyes on the most relevant documents during early case assessment and review

Interactive interface to review multimedia files, offering flexibility and scalability to meet your business needs without impacting user operations

## SortVault Platform BENEFITS

Sophisticated and custom fit to customer-based solutions

Highly experienced project management

Simple per-document pricing amplifies cost savings

Full-time review staff takes care of churn

Instantly from Day 1 get a dedicated team reviewing different batches of documents within a matter and different legal matters across multiple counsels for quicker and more accurate handling of the E-discovery.

***Get the simplicity of an integrated E-Discovery Platform combined with master professional services to empower your E-discovery teams and expedite completion of your cases with confidence.***
